Obstetric and Maternal-Fetal Evidence-Based Guidelines (Two-Volume Set) (Maternal-Fetal Medicine) Vincenzo Berghella

This two book set reviews the evidence for best practice in obstetrics and maternal-fetal medicine. The books presents the reader with the right information, in the right format, by summarizing evidence in easy-to-use tables and algorithms.

The use of each guideline is aimed at "make it easy to do it right", with appropriate use of proven interventions and no use of harmful interventions. Plenty of evidence is available so that well-informed clinicians can reduce errors, so that the first aim is ultimately to improve the health of mother and fetus by providing quality care.

The set will be essential reading for all obstetricians and gynecologists, both in training and already in practice, and their staff and patients.

Both books are also available separately.
