## Micromanufacturing Engineering and Technology (Micro and Nano Technologies) Yi Qin

This book presents applicable knowledge of technology, equipment and applications, and the core economic issues of micromanufacturing for anyone with a basic understanding of manufacturing, material, or product engineering.

It explains micro-engineering issues (design, systems, materials, market and industrial development), technologies, facilities, organization, competitiveness, and innovation with an analysis of future potential.

The machining, forming, and joining of miniature / micro-products are all covered in depth, covering: grinding/milling, laser applications, and photo chemical etching; embossing (hot & UV), injection molding and forming (bulk, sheet, hydro, laser); mechanical assembly, laser joining, soldering, and packaging.

- Presents case studies, material and design considerations, working principles, process configurations, and information on tools, equipment, parameters and control
- Explains the many facets of recently emerging additive / hybrid technologies and systems, incl: photo-electric-forming, liga, surface treatment, and thin film fabrication
- Outlines system engineering issues pertaining to handling, metrology, testing, integration & software
- Explains widely used micro parts in bio / medical industry, information technology and automotive engineering.
- Covers technologies in high demand, such as: micro-mechanical-cutting, lasermachining, micro-forming, micro-EDM, micro-joining, photo-chemical-etching, photo-electro-forming, and micro-packaging

### **From reader reviews:**

#### **Christy Dennie:**

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Micromanufacturing Engineering and Technology (Micro and Nano Technologies). Try to face the book Micromanufacturing Engineering and Technology (Micro and Nano Technologies) as your buddy. It means that it can being your friend when you feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you far more confidence because you can know anything by the book. So , we should make new experience in addition to knowledge with this book.

#### **Alice Smith:**

The book Micromanufacturing Engineering and Technology (Micro and Nano Technologies) can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Micromanufacturing Engineering and Technology (Micro and Nano Technologies)? A few of you have a different opinion about book. But one aim in which book can give many facts for us. It is absolutely proper. Right now, try to closer with the book. Knowledge or data that you take for that, you can give for each other; it is possible to share all of these. Book Micromanufacturing Engineering and Technology (Micro and Nano Technologies) has simple shape however, you know: it has great and big function for you. You can look the enormous world by open up and read a publication. So it is very wonderful.

#### **Lynn Lambert:**

In this 21st century, people become competitive in each and every way. By being competitive right now, people have do something to make these individuals survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated it for a while is reading. That's why, by reading a guide your ability to survive increase then having chance to stand than other is high. For you who want to start reading any book, we give you this Micromanufacturing Engineering and Technology (Micro and Nano Technologies) book as nice and daily reading e-book. Why, because this book is usually more than just a book.

#### **Kay Davidson:**

Is it you who having spare time subsequently spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Micromanufacturing Engineering and Technology (Micro and Nano Technologies) can be the solution, oh how comes? A book you know. You are thus out of date, spending your time by reading in this completely new era is common not a geek activity. So what these textbooks have than the others?
