Pulsed Neural Networks (Bradford Books)

Pulsed Neural Networks (Bradford Books)

Most practical applications of artificial neural networks are based on a computational model involving the propagation of continuous variables from one processing unit to the next. In recent years, data from neurobiological experiments have made it increasingly clear that biological neural networks, which communicate through pulses, use the timing of the pulses to transmit information and perform computation. This realization has stimulated significant research on pulsed neural networks, including theoretical analyses and model development, neurobiological modeling, and hardware implementation.

This book presents the complete spectrum of current research in pulsed neural networks and includes the most important work from many of the key scientists in the field. Terrence J. Sejnowski's foreword, "Neural Pulse Coding," presents an overview of the topic. The first half of the book consists of longer tutorial articles spanning neurobiology, theory, algorithms, and hardware. The second half contains a larger number of shorter research chapters that present more advanced concepts. The contributors use consistent notation and terminology throughout the book.

Contributors: Peter S. Burge, Stephen R. Deiss, Rodney J. Douglas, John G. Elias, Wulfram Gerstner, Alister Hamilton, David Horn, Axel Jahnke, Richard Kempter, Wolfgang Maass, Alessandro Mortara, Alan F. Murray, David P. M. Northmore, Irit Opher, Kostas A. Papathanasiou, Michael Recce, Barry J. P. Rising, Ulrich Roth, Tim Schönauer, Terrence J. Sejnowski, John Shawe-Taylor, Max R. van Daalen, J. Leo van Hemmen, Philippe Venier, Hermann Wagner, Adrian M. Whatley, Anthony M. Zador.

From reader reviews:

Christi Ross:

Have you spare time to get a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a wander, shopping, or went to often the Mall. How about open or read a book allowed Pulsed Neural Networks (Bradford Books)? Maybe it is to become best activity for you. You know beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with the opinion or you have various other opinion?

Donald Labelle:

In this 21st one hundred year, people become competitive in most way. By being competitive right now, people have do something to make these people survives, being in the middle of the particular crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated the item for a while is reading. That's why, by reading a guide your ability to survive enhance then having chance to stand up than other is high. In your case who want to start reading the book, we give you this specific Pulsed Neural Networks (Bradford Books) book as beginning and daily reading e-book. Why, because this book is greater than just a book.

Daniel Downey:

Spent a free time to be fun activity to complete! A lot of people spent their down time with their family, or their very own friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your own free time/ holiday? Can be reading a book can be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the e-book untitled Pulsed Neural Networks (Bradford Books) can be good book to read. May be it might be best activity to you.

Teresa Cook:

Often the book Pulsed Neural Networks (Bradford Books) has a lot info on it. So when you check out this book you can get a lot of profit. The book was written by the very famous author. Mcdougal makes some research previous to write this book. This particular book very easy to read you can get the point easily after perusing this book.
