*Tao of Life: The Fractal Gift* is Volume 3, 3rd Edition, in the DOUBLE BUBBLE TOE series. Here Katya Walter, PhD, describes how the genetic code and ancient China's I Ching correlate. Together they provide a Rosetta Stone that can help decode the graviton action that builds our universe using a fractal co-chaos system. She also discusses metaphysical aspects around this issue, including dreams, remote viewing, and a unified mind existing in nature itself.

This book has 12 chapters in 107 sections, a Series Summary, Bibliography, Reviews, and 70 graphics and charts. The ebook has color graphics with greater distinctions, searchable text, an interactive table of contents, and 38 active links amplify the materials greatly. Consider getting both the print book and ebook for greater range of information and versatility.

The publication of a single volume in German sparked this series: *Chaosforschung*, published by Diederichs Verlag, 1992. Claus Claussen reviewed it for the magazine *Neues Denken und Handeln* in November 1992. That original book was later split and augmented to become Volumes 2 and 3 of this *Double Bubble TOE* series, first published in 2006. The series was updated in a 3rd edition in 2015. [Permission was given to adapt its next-to-last paragraph slightly to fit the scope of this new edition.]

"*Universal Life Pattern* could be a subtitle for this lofty theme that will pique your interest in the Orient. It might also be called *Breaking a Universal Code*, because it opens the door on a fascinating view of life. Number, more exactly, archetypal number, is the key to this research on chaos theory, Chinese philosophy, and DNA.

"Katya Walter, prominent philosopher from Texas, a Ph.D. who also has studied at the Jung Institute in Zurich and taught for a year at Jinan University of Guangzhou, goes to the source of life's dynamic pattern in her book. She describes how the DNA spiral of our linear-minded Western science relates to the analog-style thinking of the old I Ching. She shows that the genetic code and I Ching function through the same chaos patterns, and that the physical system of DNA can be translated mathematically into the psychic system of the I Ching.

"Other scientists, and especially Martin Schönberger (1973) in his book *Verborgener Schlüssel zum Leben - Weltformel I Ging im genetischen Code*, have earlier pointed out an astonishing correspondence between the genetic code and the I Ching.

"Walter makes reference to this work, but adds a new analog perspective, even enlightenment beyond Schönberger's book, going deeper and wider. Very concretely and beyond speculation, she lays bare a decodable correlation between amino acids and hexagrams. She shows that biochemical laws and old wisdom are connected through this mathematical pattern. It garbs old Eastern truth in new Western clothing. This chaos supersystem is provable with new terminology and computer graphics.

"Threading through the awesome labyrinth of this stunning theme, your guide Katya Walter continually startles you back into clarity with her personal engagement in the search for truth. She gives sidelong glances into her dreams, talks of her experiences and frustrations, and even jokes along the path. At such times her tone, normally scientific and yet crisp with a refreshing simplicity, takes on a more poetic lilt.

"The author takes an informative stroll through the chaos garden as she explores its profound central theme, approaching it from three distinct vistas: I Ching, chaos theory, and genetic code. This sight-seeing tour is designed to render each path fascinating yet familiar. Otherwise the waves of scientific proof could become too big.

"Above all, this carefully crafted work is a treasure trove chock full of jewels. Finally, there is a special paradoxical treasure at the bottom of the chest: without ever leaving the groundwork of science, it moves beyond logic into universal values."
