## Simulation Learning System for Medical-Surgical Nursing (Retail Access Card), 1e Elsevier

The Simulation Learning System (SLS) integrates simulation technology into your medical-surgical nursing course with realistic patient care scenarios and supportive learning resources that correspond to your medical-surgical nursing text. SLS offers: targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic health record (EHR); skills drills for perfecting your techniques; post-simulation exercises like charting and concept mapping; and review resources such as animations and text references. Using SLS helps bridge the gap between lecture and clinical to prepare you for the real world of nursing. **This product is intended to be used in an instructor-led course in order to access product content.**

- **Integrated SimChart EHR** lets you document patient care in simulations and skills drills.
- **51 online medical-surgical simulation scenarios** incorporate principles of **evidence-based practice** as well as **QSEN competencies**.
- **Skills drills** feature mini-scenarios focusing on the application of a single skill to help perfect technique and build clinical reasoning skills
- **Pre- and post-simulation activities** reinforce simulation learning and help develop critical thinking.
