**Basic Methods in Antibody Production and Characterization** Gary C. Howard, Delia R. Bethell  
Written for researchers and professionals in the fields of biomedical research, immunology, biochemistry, molecular biology, pathology, and biotechnology, *Basic Methods in Antibody Production and Characterization* uses a cookbook approach to presenting the methods for the production, characterization, and use of antibodies.

Antibodies described include polyclonal and monoclonal and those made by the phage display. *Basic Methods in Antibody Production and Characterization* focuses on specific aspects of antibodies and takes readers on a step-by-step process from antigen preparation to immunizations, adjuvants, screening, purification, storage, and applications.

Introductory material accompanies each chapter, giving readers a better understanding of the methods and applications. Ample references arm researchers with many applications pertaining to the particular technology.
