Biodiversity Communities and Climate Change Chandra Prakash Kala, Chandra Shekhar Silori

Biodiversity, Community, and Climate Change is designed to help in guiding the various principles of biodiversity conservation, effects of climate change and role of communities at various levels and landscapes. A total of 19 chapters are covered in this book and they encompass a wide range of topics including tools of biodiversity assessment ranging from conventional ecological and social survey methods to the use of latest technology such as Geographical Information System (GIS) and remote sensing.

Key Features:

- Description of biodiversity conservation with focus on the status of biodiversity from lower to higher flora and fauna
- Assessment of evaluation of impacts of allelopathic compounds on growth of native plant species
- Significant emphasis on the usefulness of geospatial techniques for monitoring urban ecosystem and biodiversity
- Specific focus on community, livelihood, and management of biodiversity
- Analysis of participatory conservation and forest management case studies to further strengthen conservation approaches
- Vital importance of community forestry, agriculture sector and biodiversity conservation in addressing the threats of climate change

Contents:

Section I: Assessment of Biodiversity

1. Fungal Biodiversity in Forests: Current Knowledge and Future Challenges
2. Spiders (Araneae) in Bhyundar Valley of the Nanda Devi Biosphere Reserve
3. Status of the Forest and Wildlife in the Binsar Wildlife Sanctuary
4. Population and Management of Medicinal Plants in Chhattisgarh
5. Application of Remote Sensing and GIS in Mapping the Plant Resources of Odisha
6. Chemical Impact of *Parthenium hysterophorus* Linn. on Some Economically Important Vegetables
7. Genetic Factors Contributing to Plants Vulnerability and Extinction
8. Use of Geospatial Techniques in Monitoring and Management of Biodiversity of Urban Ecosystems

Section II: Community, Livelihood, and Management of Biodiversity

9. From Cabbage to Conservation: Case of Community Forest Conservation by Hmong Tribe in Northern Thailand
10. Increasing Livelihood Security through Kuth Cultivation in Tons Watershed, Garhwal Himalaya
11. Case Study of Traditional Agroecosystems in Patharkot Village, Uttarakhand
12. Conservation and Livelihood Links of Joint Management of Protected Area in Phutoei National Park, Thailand
13. Sustainable Utilization and Management of Timur by Communities in Uttarakhand
14. Ethno-taxonomical Study of Medicinal Plants in the Nanda Devi Biosphere Reserve
15. Indigenous Knowledge, Use of NTFPs, and Biodiversity Conservation in Uttarakhand

Section III: Climate Change and Biodiversity Conservation

16. Climate Change and Challenges of Biodiversity Conservation
17. Role of Forests and Associated Traditional Knowledge of Local Communities in Climate Change Adaptation
18. Adaptation and Mitigation Strategies of Climate Change for Sustainable Agriculture
19. Climate Change Mitigation: Potential of Growing Tree Species of Medicinal Value
